

What is it?

We offer private prescriptions to complement your aesthetic journey.

Ensuring safe and effective treatment outcomes.

These may be prescribed before or after your procedure, or as part of a skin health plan.

Medications We Commonly Prescribe

- Aciclovir - to prevent cold sores before dermal fillers, microneedling or peels
- Tetracycline or topical antibiotics - for inflammatory skin or pre-treatment care
- Prescription-only skincare - for rosacea, pigmentation, acne, or dryness
- Oral antihistamines/steroids - for hay fever symptoms affecting eyes or skin
- Post-treatment anti-inflammatories - where required

Procedure Overview

- Consultation length: 30-60 minutes
- Includes: Medical assessment, prescription plan, aftercare
- Prescriber: Qualified clinician (NMC/GMC registered)
- Dispensing: In-clinic or via pharmacy

Treatment Summary

Pain: None

Side Effects: Vary depending on medication. All risks are discussed during your appointment

FAQs

Q: Can I request a prescription without having treatment?

A: Yes, we offer standalone prescriptions following consultation.

Q: Will I be given the medication on the day?

A: Some medications are dispensed in clinic, others sent to your pharmacy.

Q: Do I need to see a prescriber for every prescription?

A: Yes, face-to-face consultation is required every 6 months.

Q: Can I get a prescription for cold sores before fillers?

A: Yes, we recommend Aciclovir 5-7 days before treatment for those prone to outbreaks.
